1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-28, drawn to a method of injection molding,
classified in class 264, subclass 1.1.**
- II. Claims 29-35, drawn to an optical part including a polarizer,
classified in class 359, subclass 1.**

**The inventions are distinct, each from the other because of the
following reasons:**

**2. Inventions I and II are related as process of making and product
made. The inventions are distinct if either or both of the following can
be shown: (1) that the process as claimed can be used to make other
and materially different product or (2) that the product as claimed can
be made by another and materially different process (MPEP §
806.05(f)). In the instant case the injection molding process of the
group I claims can be used to make other and materially different
products such as car fenders. Similarly the optical device can be
made by an extrusion method rather than an injection molded method.**

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied

by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
